01 / WHO WE ARE

Who We Are

Enermax is a Baghdad-based engineering, construction, supply chain and field support company, serving international oil companies, their contractors and U.S. Government programs across Iraq since 2016.

We deliver engineering, procurement, fabrication, construction and maintenance, together with integrated supply, logistics and base support, to government and private sector clients. Our teams work in remote and demanding environments, from the oil fields of West Qurna, Majnoon and Siba to U.S. diplomatic and military facilities, and our clients rely on us to deliver safely, on schedule and to international standards.

Our work is organized in six business lines, giving clients one accountable partner for everything from sourcing a single valve to building, equipping and running a site.

2016
Incorporated in Baghdad, Iraq

9,000 m²
Offices and warehousing in Basra and Baghdad

~250
Units of equipment, owned and sub-contracted

1,500+
Pre-screened candidates ready to deploy

26
Reference contracts with oil majors and U.S. Government primes

ISO 9001:2015
Quality management system based on the standard

Our Mission

Our mission is to be the trusted in-country partner for government programs and international energy companies, delivering engineering, construction, supply chain and base-support services safely, on schedule and to international standards, through skilled local teams and uncompromising integrity.

رسالتنا أن نكون الشريك الميداني الموثوق للبرامج الحكومية وشركات الطاقة العالمية، من خلال تقديم خدمات الهندسة والإنشاءات وسلاسل الإمداد والدعم المعيشي والتشغيلي بأعلى معايير السلامة والجودة، وفي الوقت المحدد، بسواعد كوادر محلية مؤهلة ونزاهة لا تقبل المساومة

Our Vision

Our vision is to be the partner of choice for government and energy operations across the region, known for delivering maximum capability wherever our clients work.

رؤيتنا أن نكون الشريك المفضّل للبرامج الحكومية وعمليات الطاقة في المنطقة، والمعروف بتقديم أقصى القدرات أينما عمل عملاؤنا

Our Values

Excellence and integrity
We deliver 100% of our commitments, on time and within budget, with the highest standards of ethics and compliance.

Safety first
Safe and secure operating environments for our employees, clients and communities.

Growth through partnership
A culture of ownership that creates value for our customers and opportunity for our people.

03 / WHO WE SUPPORT

Who We Support

A registered, vetted and proven in-country partner for U.S. Government programs, their prime contractors and international energy companies in Iraq.

U.S. Government & Prime Contractors

Diplomatic, military and logistics programs in Iraq

WHO WE SUPPORT

Department of Defense (DoD)
Department of State (DoS)
Defense Logistics Agency (DLA)
Amentum (formerly PAE) PROVEN
KBR PROVEN
SallyPort Global PROVEN
V2X (formerly Vectrus)

WHAT WE BRING

- Registered and ready to subcontract: SAM.gov (CAGE SQYT8, UEI N8S3XN3ABJZ8), JCCS 85710, quality management system based on ISO 9001:2015
- Base and life support at U.S. sites: housing, DFAC and catering, waste and sanitation, water wells and facility services
- Procurement, fuel supply (D2 diesel, Jet A, JP-8) and delivery to U.S. installations, with customs and movement permits handled in-country
- Workforce services: recruiting, background and medical screening, HR and payroll, PPE, insurance and OSHA operator training

Proven: U.S. Embassy Baghdad, BDSC and Union III for PAE / Amentum (2017 – ongoing); Al Asad Airbase for KBRwyle (2017 – 2020); Balad Air Base for SallyPort Global (2018 – 2019).

International Oil Companies & Oilfield Services

Upstream fields and EPC projects in southern Iraq

WHO WE SUPPORT

ExxonMobil PROVEN
SICIM PROVEN
SLB (Schlumberger)
Shell
Chevron

WHAT WE BRING

- EPC and construction at producing fields: water injection, steel structures, substations, camp electrical works
- Pipe, valves and fittings, chemicals and oil field tools, sourced internationally and delivered to site
- Equipment and vehicle rental with trained operators: cranes, dump trucks, tankers, fire trucks, SUVs and more
- Housing (camps, CHUs, houses and apartments) and life support, with Basra warehousing close to the fields
- Local workforce: recruiting, screening, medical checks, HR and payroll, supporting your local content commitments

Proven: West Qurna-2 for SICIM (2017 – 2023); West Qurna-1 for ExxonMobil (2017 – 2019); West Qurna-2 for Lukoil (2016 – 2020); Siba for Kuwait Energy (2020 – 2022); Majnoon for Anton (2019 – 2020).

Registered	Proven on-site	Fast to mobilize	One partner
SAM, CAGE and JCCS registered, ready to onboard	U.S. Embassy, airbases and major oil fields	Bases in Baghdad and Basra; equipment in under 2 days	Six business lines under one contract

04 / OUR BUSINESS LINES

Our Business Lines

Six integrated business lines, one accountable partner. Clients can engage us for a single service or a complete package.

BUSINESS LINE 1

Engineering & Construction

Civil, structural & steel works | Electrical & mechanical installations | Mechanical & piping | Installation, testing & commissioning | Instrumentation, controls & security systems | Engineering & project management | CHUs

BUSINESS LINE 2

Oil & Gas Services

Pipe, valves & fittings | Oil field & water treatment chemicals | Oil field tools | Digital oilfield & SCADA

BUSINESS LINE 3

Supply Chain & Logistics

Procurement & strategic sourcing | Fuel supply & transport (D2, Jet A, JP-8) | Transportation & customs clearance | Warehousing

BUSINESS LINE 4

Base, Housing & Life Support

Housing & accommodation | DFAC & food services | Base operations | Power | Water & wastewater | Waste & sanitation

BUSINESS LINE 5

Workforce & Equipment

Recruiting & hiring | Screening & medical checks | HR administration & payroll | Equipment & vehicle rental

BUSINESS LINE 6

Operations, Maintenance & Integrity

Operations & maintenance | Testing, inspection & calibration | Asset integrity, coatings & insulation | Scaffolding | Industrial cleaning

Enermax lifting crew mobilised with an all-terrain crane

04 / BUSINESS LINES

BUSINESS LINE 1

Engineering & Construction

Turnkey delivery from design to commissioning

Our in-house civil, structural, mechanical and electrical engineers assess every project's requirements and respond in full to your Scope of Works, or help you write it. With our local and international procurement teams, we deliver partial or full turnkey solutions, including as prime contractor on EPC scopes.

Civil, Structural & Steel Works

General contracting, construction management and design-build, with our own fabrication capability.

- Fabrication and erection of steel structures
- Pre-cast concrete forms; reinforced concrete installation and repair
- Well pads, fencing, towers, T-walls and Jersey barriers
- Demolition (including hardened structures), site preparation and road repair

CHUs & Relocatable Buildings

We fabricate our own containerized housing units (CHUs) from off-the-shelf designs or to your specification, using locally sourced materials that reach our manufacturing unit within hours of an order.

- Built by our fabricators, painters, electricians and carpenters under engineer supervision
- Accommodation, offices, ablutions and storage for camps, bases and project sites
- Specialist materials from international suppliers for a bespoke turnkey solution
- Foundations, utilities and power connections

Electrical & Mechanical Installations

Complete electromechanical works for 400/132/33/11 kV substations, including associated civil works, from order to handover.

- Erection of AIS/GIS switchgear and transformers up to 400 kV
- LVAC, control, protection and communication systems (PLC, SCADA, PABX)
- HV, MV and LV cabling, jointing and terminations
- Testing and commissioning of indoor and outdoor substation equipment

Engineering & Project Management

Site surveys, design in AutoCAD and AutoCAD 3D, water system modelling in WaterCAD, and project controls throughout delivery.

- Project leadership, reporting and budget tracking
- Weekly job documentation, site visits and change order management
- FEED and detailed design for process and utility facilities, with partner engineering firms
- Technical advisory, troubleshooting and performance improvement studies

04 / BUSINESS LINES | ENGINEERING & CONSTRUCTION

Installation, Controls & Site Systems

From mechanical completion to the systems that monitor and protect a site, we take projects through to handover and operation.

Mechanical & Piping

Piping and mechanical works for process, water and utility facilities.

- Pipe laying and inspection
- Water injection and treatment facilities, pumping stations
- Mechanical and piping installation with qualified welders (ASME IX / API 1104)
- Mechanical completion, flushing and hydrostatic testing of piping systems

Installation, Testing & Commissioning

Equipment and systems integrated, tested and ready to operate.

- Installation and supervision of equipment and packages
- Pre-commissioning checks, testing and energisation of electrical equipment
- Commissioning support and handover documentation
- Start-up assistance and operator support

Instrumentation & Controls

Control and protection systems that keep facilities safe and running.

- PLC, SCADA and PABX within electrical and substation scopes
- Field instrumentation installation and loop checks
- Fire & gas and emergency shutdown (ESD) systems
- Hazardous-area (Ex) installation and inspection

IT, Security & Digital Systems

Connected, monitored and protected sites, with our technology partner.

- Digital oilfield: SCADA, IoT and automation for real-time monitoring
- CCTV, access control and perimeter intrusion detection: supply and installation
- Structured cabling, fibre optic and site networks
- Radio and telecoms for remote sites

How we deliver

1 Survey
Site survey, scope review, risks and constraints

2 Plan
Execution plan, schedule, HSE plan, JSAs and quality plan

3 Procure
Qualified vendors, inspection on receipt, certificates

4 Execute
Supervised crews, permits to work, daily reports

5 Handover
Testing, as-built records and close-out documentation

Proven: 132 kV GIS substation installation, testing and commissioning, West Qurna-2 (SICIM, 2017); pipe laying and inspection, West Qurna-2 (Lukoil, 2016-2017); pumping station installation, Balad (SallyPort Global, 2018-2019).

T-wall barriers supplied and installed in the field

04 / BUSINESS LINES

BUSINESS LINE 2

Oil & Gas Services

Materials, tools and technology for upstream and downstream operations

We supply quality-controlled materials, chemicals and tools to oil field operators and their contractors, sourced through our international network and delivered to site.

Pipe, Valves & Fittings

A full PVF range for midstream and downstream projects, supplied under our ISO 9001:2015-based quality controls.

- Pipeline valves to API 6D & 6A, including trunnion-mounted ball and double block & bleed plug valves
- Gate, globe, check, ball, butterfly, plug and knife gate valves
- Bellows seal, coker, diaphragm, HF acid and flow control valves

Industrial Chemicals & Water Treatment

Chemicals for drilling, workover and completion, production, well stimulation, water treatment and general utilities.

- Shale stabilizers, thinners, defoamers and foaming agents
- Mud lubricants, surfactants, spotting fluids and fluid loss additives
- Loss circulation material, drilling polymers, corrosion inhibitors and biocides
- Scale inhibitors and fouling control
- Water treatment chemicals and dosing: chlorine, bromine, lime, PAC
- Chemical application technical support

Oil Field Tools

Downhole and surface tools for drilling and production.

- Blowout preventer (BOP) rams, wellheads and Christmas trees
- Electrical submersible pumps (ESP)
- Drill pipe, heavy-weight drill pipe and drill collars
- Roller cone and PDC bits, milling bits, stabilizers and roller reamers

Digital Oilfield & SCADA

With our technology partner, we provide hardware and software for real-time monitoring and analysis through SCADA, IoT and automation, helping operators improve recovery and reduce non-productive time.

Pipeline valves, fittings and spares

Digital oilfield: SCADA monitoring and automation

04 / BUSINESS LINES

BUSINESS LINE 3

Supply Chain & Logistics

Sourcing, moving and storing what your project needs

Our dynamic, flexible procurement and logistics teams respond quickly to source and deliver high-quality products that meet your specifications, locally and internationally. We are experienced in multi-border operations, moving materials from international suppliers to remote field sites with the documentation, permits and storage in between.

Procurement & Strategic Sourcing

Established vendor relationships in the UAE, United States, China, India, Europe, the UK, Kuwait and Saudi Arabia give our clients access to items not readily available locally.

- Competitive pricing and supply market analysis
- Supplier selection, qualification and performance management
- Contract and material management

Warehousing

Secure storage, consolidation and staged delivery from our own facilities.

- Basra: 1,500 m² office and 5,000 m² warehouse
- Baghdad: 2,500 m² warehouse

Transportation & Customs Clearance

Door-to-door delivery across Iraq with our own trucks, trailers and cranes.

- Customs clearance and import documentation
- Movement permits and authorizations, coordinated with the Iraqi Police and provincial authorities
- Heavy and oversized loads with low-bed trailers and cranes
- Packing lists, delivery tickets and shipment tracking under Incoterms 2020

Quality & Traceability

Materials as specified, with proof.

- Inspection on receipt against the purchase specification
- Certificates and documentation delivered with every shipment

Proven supply and logistics contracts

Client	Scope	Location	Period
PAE / Amentum	General procurement and logistics services, multiple awards	BDSC, U.S. Embassy (IZ-BEC), Union III	Jan 2017 – ongoing
ExxonMobil	Oil and gas supplies and logistics agreement, multi-award	West Qurna-1 Field	Jul 2017 – Jan 2019
Lukoil Mideast Iraq	Oil and gas supplies and logistics agreement	West Qurna-2 Field	Jul 2016 – Sep 2020
Kuwait Energy Iraq	Compressor spares (prime contractor); PPE and medical supplies (call-off)	Siba gas field	Jan 2021 – Jan 2022

04 / BUSINESS LINES | SUPPLY CHAIN & LOGISTICS

Fuel Supply & Transport

We supply and deliver D2 diesel and Jet A and JP-8 aviation fuel to bases, airfields, camps, oil fields and project sites, with the tanker fleet, permits and documentation to keep your generators, vehicles and aircraft running.

Fuel Supply

Sourced from licensed suppliers, in the grade and quantity you specify.

- D2 diesel for generators, vehicles and plant
- Jet A and JP-8 aviation fuel for airfields, airbases and helipads
- Bulk, scheduled and on-call deliveries
- Long-term supply agreements and call-off contracts

Quality & Safety

Fuel that arrives clean, on spec and safely.

- Supplier quality certificate for every batch
- Sampling and checks before delivery
- Trained, licensed tanker drivers
- Spill kits and fire extinguishers on every tanker

Fuel Transport & Delivery

Delivery by tanker, wherever your operation is.

- Fuel tankers from our own and partner fleets
- Delivery to bases, airfields, camps, oil fields and generator sites
- Generator and equipment refuelling on site
- Movement permits and authorizations handled in-country

Accountability

Every litre documented and reconciled.

- Delivery tickets signed on receipt for every load
- Quantity reconciliation against orders and meter readings
- Monthly consumption reports on request

How a fuel order works

1 Order
You set the grade, quantity, sites and delivery schedule

2 Source
We buy from licensed suppliers and check the quality certificate

3 Deliver
Our tankers deliver and refuel on site, with permits in place

4 Reconcile
Signed delivery tickets and quantities reconciled for invoicing

Site clearance and material loading

Fabricated steel dumpsters loaded for delivery

04 / BUSINESS LINES

BUSINESS LINE 4

Base, Housing & Life Support

Housing people and keeping camps, compounds and bases running

We provide fast, cost-effective housing and the essential services that keep sites operating, for contract workers, military personnel and displaced families, with rapid mobilization in demanding environments. We currently hold four Amentum contracts at the U.S. Baghdad Embassy Complex.

Housing & Accommodation

Ready-to-occupy housing for client and contractor staff, fully serviced by our own teams.

- Camps and CHUs at oil fields, bases and project sites, from single units to complete camps
- Furnished houses and apartments in the city
- Cleaning, housekeeping and laundry
- Maintenance and utilities: power, water and internet
- Catering and meal services from our DFAC teams
- Security, access control and transport to site

Base Operations & Facility Management

Integrated support for camps, bases and compounds.

- Facility operation and maintenance
- Cleaning and janitorial services, including chemical latrines
- Site services and minor works

Water & Wastewater

Water supply and treatment for oil fields, camps and bases.

- Mobile water treatment plants (2, 7 and 12 MLD)
- Wastewater treatment and floating treatment systems
- Pumping stations and sewage network connections
- Water well drilling, maintenance, and plug and abandonment
- Chemical dosing (bromine, chlorine, lime, poly bentonite, PAC)

Waste Management & Sanitation

Collection, hauling and disposal with our own vacuum trucks, dumpster trucks and hook-lifts.

- Sludge, wastewater and FOG (fats, oils and grease) removal
- Bulk trash removal: 6.0 m³ dumpsters and compactor trucks
- Debris collection, hauling and disposal
- Chemical latrine servicing and cleaning

Power Generation

Temporary and backup power for camps and project sites.

- Generator sets from 130 to 350 kVA (Perkins)
- Temporary power distribution and camp electrical works

04 / BUSINESS LINES | BASE, HOUSING & LIFE SUPPORT

DFAC & Food Services

We run dining facilities and food services for camps, bases and project sites, from a single site kitchen to full DFAC operations: hot meals, safe drinking water and strict food safety, delivered by vetted, trained and medically screened staff.

Dining Facility (DFAC) Operations

Complete operation of dining facilities, from menu to clean-down.

- Menu planning for cultural and dietary needs: halal, Western, vegetarian
- Cooking, serving and line management for all meal periods
- Dishwashing, cleaning and pest control
- Trained cooks, kitchen and serving staff

Catering & Meal Delivery

Meals where your people are working.

- Hot and packed meals delivered to sites, camps and offices
- Insulated transport that keeps food at safe temperatures
- Event and VIP catering

Food & Water Supply

Reliable supply of food stock and drinking water.

- Fresh, frozen and dry food from approved suppliers
- Bottled drinking water and ice
- Cold storage with first-in, first-out stock rotation

DFAC Facilities

Kitchens and dining halls, built and kept running.

- Supply and fit-out of kitchens and dining halls, including CHU-based units
- Kitchen equipment, cold rooms and freezers
- Maintenance and repair of kitchen equipment

Food Safety

A HACCP-based food safety system at every stage.

- HACCP-based food safety plan for each facility
- Temperature control and records from delivery to serving
- Hygiene training and medical checks for food handlers
- Regular inspections and internal audits

Complete life support under one contract: housing, DFAC and catering, drinking water, power, waste and sanitation, and facility management, delivered by one accountable partner.

Portable toilets and hand-wash stations ready for deployment

04 / BUSINESS LINES

BUSINESS LINE 5

Workforce & Equipment

Recruiting, HR, payroll and the equipment to get the job done

We look after the full employment cycle for the people our clients need: recruiting and hiring, background and medical screening, HR administration, timekeeping and payroll, and the support that keeps crews safe and productive on site.

Recruiting & Hiring

A database of 1,500+ qualified, pre-screened candidates and rigorous one-on-one interviews, so you review only the three best-suited candidates.

- Standard placement in 24 hours; executive placement in 48 hours
- 48-hour guarantee: replacement free of charge if a candidate is not the right fit
- IT, engineering, technical, administrative, finance, craft, labor, domestic and driver roles
- Single hires, project crews and long-term contract staffing

Screening & Vetting

Every candidate is checked before mobilization, to your requirements and your site's security rules.

- Full background, reference and qualification checks
- Identity and document verification
- Support with client badging and site-access applications
- Re-screening and records kept up to date for audits

Medical Screening

Pre-employment and periodic medical checks through approved clinics, so every worker is fit for the job.

- Pre-employment medical examinations
- Fitness-for-work and periodic health checks
- Medical records managed confidentially

HR Administration & Payroll

We handle the paperwork, so our clients can focus on the work.

- Employment contracts, onboarding and personnel files
- Accurate timekeeping, payroll and payslips
- Leave, overtime and allowances managed to contract
- Insurance, as required, and compliance with local labor law

Mobilization & Welfare

Crews arrive equipped, transported and ready to work safely.

- PPE, transportation and accommodation
- Health and safety checks, audits and controls
- Equipment operator training to OSHA standards

Proven: recruiting and medical screening for Kuwait Energy Iraq at the Siba gas field (Mar 2020 – Mar 2021), and crews deployed across our U.S. Government and oil and gas contracts since 2016.

04 / BUSINESS LINES

Equipment & Vehicle Rental

From heavy cranes and airfield fire trucks to SUVs, we supply the equipment and vehicles your operation needs, from our own fleet of around 250 owned and sub-contracted units and our network of partner fleets, backed by leading manufacturers.

Lifting & Material Handling

- Mobile and rough-terrain cranes up to 140 T
- Container reach stackers
- Forklifts and telehandlers
- Man lifts and aerial work platforms

Earthmoving & Construction

- Dump trucks and tippers
- Excavators, loaders and backhoes
- Low-bed and flatbed trailers
- Trucks with cranes (boom trucks)

Fire & Emergency

- Firefighting trucks
- Airfield crash and rescue fire trucks
- Ambulances
- Water bowsers for fire cover and dust control

Waste & Sweeping

- Garbage compactor trucks and hook-lifts
- Vacuum trucks
- Street sweepers
- Airfield and runway sweepers

Tankers

- Water tankers (potable and non-potable)
- Fuel tankers
- Wastewater and sewage tankers

Passenger & Light Vehicles

- SUVs
- Pickup trucks
- Vans, minibuses and buses
- Generator sets and lighting towers

Rental terms

- Short-term and long-term rental, from one day to multi-year contracts
- Supplied bare or with qualified, trained and vetted operators and drivers
- Maintenance, servicing and breakdown support by our full-time mechanics
- Turnaround for mission-critical equipment in under two days
- Fleet availability consistently above 95%
- Registration, insurance and movement permits handled in-country

For specialised units (airfield fire trucks, reach stackers, runway sweepers), confirm availability and lead time when requesting a quotation.

BUSINESS LINE 6

Operations, Maintenance & Integrity

Keeping assets running, inspected and protected

We keep facilities, wells and equipment running with planned and call-out maintenance, and we inspect, test and protect the assets our clients depend on, with our QA/QC team and accredited third-party partners.

Operations & Maintenance

Planned and call-out maintenance teams, backed by our own mechanics.

- Planned and call-out maintenance of facilities, pumps, water wells and equipment
- Operation and maintenance of camp and base facilities
- Fleet maintenance and breakdown support
- Spares supply and stock support for maintenance programmes
- O&M; manpower for production facilities (technicians and craft) under client supervision

Testing, Inspection & Calibration

Inspection and testing that confirm materials, equipment and systems meet specification.

- Receipt inspection of materials against the purchase specification and certificates
- Non-destructive testing (UT, RT, MPI, DPI) through accredited partners
- Pressure and hydrostatic testing
- Calibration of instruments and test equipment through accredited laboratories
- Inspection and certification of lifting equipment by third-party bodies

Asset Integrity & Coatings

Surface protection and insulation that extend asset life, supported by our AMPP membership.

- Surface preparation (abrasive blasting) and protective coatings
- Corrosion protection, including supply of inhibitors and biocides
- Thermal insulation and passive fireproofing
- Scaffolding supply and erection with trained scaffolders

Industrial Cleaning

Cleaning and waste services with our own vacuum trucks.

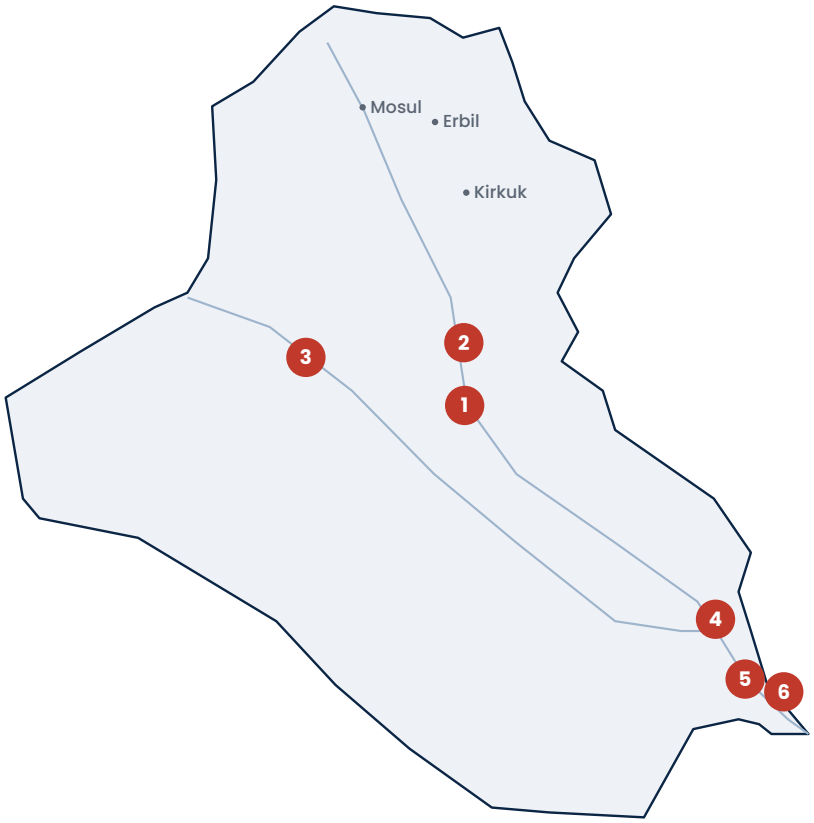
- Sludge, wastewater and FOG removal
- Tank and pit cleaning support
- Collection, hauling and disposal at permitted sites

Proven: call-service maintenance of 7 water wells (KBRwyle, Al Asad, 2018-2020); sludge, wastewater and FOG removal with our own vacuum trucks (Amentum, U.S. Embassy Baghdad, 2024 to date).

05 / WHERE WE WORK

Where We Work

Headquartered in Baghdad with offices and warehousing in Basra, we deliver at oil fields, bases and diplomatic facilities across Iraq.



Illustrative map, not to scale.

1 Baghdad
Head office. U.S. Embassy Complex, BDSC and Union III: four active Amentum contracts (debris, bulk trash, sludge, chemical latrines), water wells, civil works, procurement and logistics (PAE / Amentum).

2 Balad Air Base
Pumping station and sewage network connection (SallyPort Global).

3 Al Asad Airbase
Deep water well drilling and maintenance of 7 water wells (KBRwyle).

4 West Qurna-1, West Qurna-2 & Majnoon
EPC water injection works, 132 kV substation, T-walls, equipment rental and supplies (SICIM, ExxonMobil, Lukoil, Anton).

5 Basra
Office and warehousing. JV supply to power stations at Rumaila and Khor Al-Zubair.

6 Siba
Compressor spares, PPE and medical supplies, and recruiting (Kuwait Energy Iraq).

Demolition of a hardened aircraft shelter (HAS-1), Baghdad

Equipment and container yard

06 / FEATURED PROJECTS

Featured Projects

A selection of contracts that show the range of our work, from EPC delivery for oil majors to essential services at the U.S. Embassy in Baghdad.

ENGINEERING, PROCUREMENT & CONSTRUCTION

Produced Water Treatment & Water Injection Facilities Expansion, Phase I

CLIENT	OUR ROLE	PERIOD	LOCATION
SICIM	**Prime contractor**	**Sep 2022 – Aug 2023**	**West Qurna-2 (Phase 2)**

What we delivered

- Steel structure works for the produced water treatment and water injection facilities expansion
- Engineering, procurement and construction delivered as prime contractor
- Part of a long relationship with SICIM at West Qurna-2 since 2017, including substation works, T-walls, camp electrical works and equipment rental

BASE & LIFE SUPPORT

Waste & Sanitation Services, U.S. Baghdad Embassy Complex

CLIENT	OUR ROLE	PERIOD	LOCATION
PAE / Amentum	**Subcontractor and service provider**	**Mar 2024 – ongoing**	**U.S. Baghdad Embassy Complex**

What we delivered

- Four active contracts with Amentum at the Embassy Complex: debris removal, bulk trash removal, sludge removal and cleaning of chemical latrines
- Sludge, wastewater and FOG removal since March 2024 (also at the Union III Compound, Mar 2024 – Sep 2025); bulk trash removal for 6.0 m³ dumpsters since July 2026; debris removal and chemical latrine cleaning since August 2026
- Construction of two new water wells at the Embassy Complex (Feb – Jun 2024)

Sludge and wastewater removal crew with vacuum tankers, Baghdad

Bulk trash collection from a roll-off dumpster

ELECTRICAL INSTALLATION (LUMP SUM)

Installation & Commissioning of a 132 kV Gas-Insulated Substation

CLIENT	OUR ROLE	PERIOD	LOCATION
SICIM	**Subcontractor**	**Mar 2017 – Nov 2017**	**West Qurna-2 Field**

What we delivered

- Installation of a 132 kV gas-insulated substation on a lump-sum basis
- Testing and commissioning through to handover

WATER & WASTEWATER

Water Well Drilling & Maintenance, Al Asad Airbase

CLIENT	OUR ROLE	PERIOD	LOCATION
KBRwyle	**Subcontractor**	**Dec 2017 – Aug 2020**	**Al Asad Airbase**

What we delivered

- Drilled two deep water wells (about 150 m) and plugged and abandoned two dry wells (lump sum, Dec 2017 – Jan 2018)
- Call-service maintenance contract for 7 water wells (Aug 2018 – Aug 2020)

07 / PAST PERFORMANCE

Past Performance

26 reference contracts with U.S. Government prime contractors and international oil companies, most recent first.

U.S. Government Programs

Project / scope	Client (prime)	Period	Our role	Location
Waste management: debris removal (collection, hauling and disposal)	Amentum	Aug 2026 – ongoing	Service provider	U.S. Baghdad Embassy Complex

Hands-on oversight: inspection at the fabrication shop

09 / QHSE POLICY STATEMENT

QHSE Policy Statement

Enermax for Trading and General Contracting LLC is committed to delivering services and products that meet our clients' requirements, while protecting the health, safety and security of our employees, subcontractors, clients and the communities where we work, and minimising our impact on the environment. Quality, health, safety and environment (QHSE) is a core value and a line-management responsibility, shared by every employee and subcontractor.

To deliver this commitment, we will:

1. **Safety first.** We aim for zero harm. Every employee and subcontractor has the authority and the duty to stop any unsafe work.
2. **Compliance.** We comply with all applicable laws and regulations, client and contract requirements, and international standards.
3. **Quality.** We maintain a quality management system based on ISO 9001:2015 and deliver our work right first time and on schedule.
4. **Prevention.** We identify hazards, assess risks and put controls in place before work starts, through job safety analysis and permits to work.
5. **Environment.** We prevent pollution, manage waste responsibly and use resources efficiently.
6. **Competent people.** We give our people the training, personal protective equipment and supervision they need, and confirm they are fit for work.
7. **Supply chain.** We hold our suppliers and subcontractors to the same QHSE standards we set for ourselves.
8. **Report and learn.** We report every incident and near miss without blame, investigate the causes and act to prevent recurrence.
9. **Emergency readiness.** We plan, train and drill for emergencies, crises and business disruption.
10. **Continual improvement.** We set measurable QHSE objectives, monitor our performance and review this policy every year.

This policy is communicated to all employees and subcontractors, displayed at our offices and work sites, made available to clients and other interested parties, and reviewed annually by management.

10 / QUALITY, CONDUCT & LOCAL KNOWLEDGE

Quality, Conduct & Local Knowledge

Quality

We work closely with our customers to deliver reliable, competitively priced solutions on time, through continuous improvement of our quality management system, based on ISO 9001:2015, and a well-trained, empowered team. Our objectives focus on process performance, product quality including on-time delivery, and supplier management.

Code of Conduct & Ethics

Our business depends on the trust of our employees and customers. We earn it by keeping our commitments, acting with honesty and integrity, and reaching our goals only through honorable conduct.

Local Knowledge

We have in-country knowledge of legal jurisdictions, labor law and the workings of the Iraqi Government, and we keep up to date with the codes, standards and regulations that govern the transport of materials and equipment.

Local Content

Iraqi-owned and managed, we recruit, train and develop Iraqi nationals and buy locally where quality allows. 90% of our workforce are Iraqi nationals, and 55% of them are Basra residents. We have supplied PPE and medical supplies to communities around the Siba gas field (Kuwait Energy Iraq, 2021-2022).

Our People

Our people are our greatest strength: trained professionals from multiple disciplines, dedicated to safety and customer service, in an inclusive culture that helps every customer reach their goals.

Joint Ventures & Partnerships

Al-Mada'an for Trading & General Contracting

A long-term partnership to pursue projects in Iraq. Founded in 2005 with offices in Basra, Al-Mada'an provides electrical services and supplies to the Iraqi Ministry of Electricity, including turbine oils, cleaners, air filters, bearings, transformers and valves for the General Company of Electrical Energy Production, South Region (2015–2019).

West East Business Exchange (WEBEX), Prague

A long-term partnership with a European firm with more than 35 years of engineering experience in water treatment, edible oil refineries, fertilizer production lines, metal storage systems and biogas stations.

Technology Partner (Digital Oilfield)

Hardware and software for real-time monitoring and analysis through SCADA, IoT and automation.
